# VVManual

Does the VVM assists the DOEs in  
undertaking Validation & Verification work?

Industrie Service

# YES

- Immediate effect and the requirements need to be fully integrated into DOEs management system (EB 44).
- Information can be considered credible if it is authentic (para& 10)
- Submit to EB all negative reports (para& 32) or notify the EB (para& 167 b)
- Confirmation of authenticity of letter of approval with the DNA (para& 47-48)

- Obligatory on-site visit
  - Validation: for existing facilities or utilizing existing equipments (para& 59-61)
  - All verification unless informed the reason of not doing so (para& 188)
- Applicability: The project activity is not expected to result in emissions other than those allowed by the methodology (para& 70)
  - DOE shall report all GHG that could contribute to more than 1% of ER, which are not in the methodology. (para& 76)
  - Emissions affected by the project and not included in the methodology trigger a clarification or deviation (para& 79)

- Implementation of monitoring plan: the PPs should have at validation stage documented procedures (para& 121 b)
- In verification the DOE shall describe the data that cause an increment of the ER respect to the PDD (para& 189 c)
- The DOE shall list EACH parameter and described how IT has been verified (para& 197)
- A deviation is only valid for the monitoring period, if it continues a request for revision of MP shall be presented (para& 205)
  - A revision of MP shall ensure that the level of accuracy and completeness is not reduced (para& 208)
