LATIN AMERICA CLIMATE SUMMIT 2022

Carbon Markets for Net Zero: An Era of Growth, Convergence, Innovation and Opportunity

Introduction

After two years apart, we at the International Emissions Trading Association (IETA) look forward to welcoming delegates to our flagship **Latin America Climate Summit (LCAS)** on **17-19 October 2022**, an official Rio2030 accredited event.

The Summit, taking place at [The Copacabana Palace in Rio de Janeiro](#), is the ideal forum to take-stock of the LAC regional evolving net zero landscape and clean growth opportunities. Join us in Rio to hear from policymakers, business and innovators who are leading the pack in building, scaling and collaborating on markets for net zero.

Organised by IETA, in collaboration with ICAP, LACS 2022 is an in-person event with some sessions in a hybrid format to allow for virtual participation. The Summit features high-level plenaries, Latin America and Caribbean focused as well as cross-cutting thematic deep-dive workshops and roundtables, and a central 'Carbon Market Square' with Partner Sponsors display counters, a networking chill-out lounge, coffee breaks and receptions.

Daily Overview

17 October – PRE-DAY: Closed door meetings & Invitation only events & LACS Official Welcome Reception

18 October – DAY 1: Summit sessions & Partner Sponsors side event sessions, opened to all delegates & IETA Members Nightcap Reception (invite only)

19 October – DAY 2: Summit sessions & Partner Sponsors side event sessions, opened to all delegates

DD1	11:30-12:30	<p>Article 6 Implementation and Carbon Markets in LAC: Moving from Concept to Practice</p> <p>This session will explore how countries in the LAC region are implementing cooperative approaches under Art. 6 of the Paris Agreement in the wake of the landmark agreement at COP 26. The impact on existing carbon pricing mechanisms as well as the buoyant voluntary market in the region will be discussed.</p>
DD2	11:30-12:30	<p>Scaling Technology-Based Solutions in Latin America</p> <p>To date, nearly 80% of credits issued in Latin America have come from forestry and land use projects meaning only 20% have come from technology-based solutions. The urgency of having a broad set of tools to combat climate change motivates us to explore the need to scale technology-based solutions. Join this deep dive to discuss which project types in this category are well-suited for scale in Latin America, the barriers needed to be overcome to achieve scale, and where geography-specific strengths could be leveraged to lead emission reductions globally.</p>
