CMM-WG: 2022 work plan

Aglaja Espelage
Perspectives Climate Research

31 March 2022
MENA climate week
The CMM-WG offers a dialogue platform for exchanging experiences and coordinating efforts to support robust carbon market cooperation under Article 6 of the Paris Agreement.

- **Regular informal meetings**, to share experiences, challenges and success stories
- **Background papers** to consolidate a common understanding of key technical issues
- **Regular workshops and consultations** with relevant stakeholders on specific topics

Funded and coordinated in close collaboration with the German Federal Ministry for Economic Affairs and Climate Action (BMWK).
### Focus areas for technical discussion of the CMM-WG

#### OPERATIONALISATION of the quality requirements of the A6.4M
- Operationalisation of links to NDCs and increase of ambition
- Development of methodological requirements and operationalisation of methodological principles & approaches to set baselines and determine additionality, including guidelines for the review of CDM methodologies

#### PRACTICAL CONSIDERATIONS beyond the official SBSTA/CMA work programme
- Donor coordination for Art. 6 CB
- Interplay of Art. 6 accounting rules, NDC targets (conditional/unconditional), NDC implementation periods and crediting periods and implications for activity design.
- Market stabilisation instruments: price floors, price guarantees and other instruments.
- Equitable sharing of mitigation outcomes depending on market prices, including lessons learned from JCM.
- Role of domestic carbon pricing for ambition rising and link to discussion on non-authorised A6.4ERs

#### REACTIONS to inputs from CMM-WG members on technical challenges
- Transparency on the integrity of market-based cooperation: accounting, reporting and review
- Finance raised by Article 6 cooperation (share of proceeds, administrative costs, and adaptation finance)
- National institutions and arrangements (including capacity building)
How to get involved

Options for engagement

• Government actors, technical experts (including consultants, programme developers, auditors, etc.) and financial institutions can take part in CMM-WG workshops and meetings
  • Virtual engagement throughout the year
  • In-person events at international conferences, as far as possible
• Provide technical input to draft papers / disseminate papers and outputs
  • E.g., sharing information on your initiatives and lessons learned
• If you are interested in engaging, contact us directly or subscribe to the mailing list: information can be found here: https://www.perspectives.cc/public/initiatives/carbon-market-mechanisms-working-group/
• Or get engaged with Perspectives colleague Laila Darouich (darouich@perspectives.cc), at MENA climate week
