PACM & CLEAN COOKING: WHERE WE ARE

MEP 014 (22–26 Jun)

- Recommends the “Energy efficiency measures in household cooking” methodology for adoption
- Applies non-permanence provisions to clean cooking

SBM 022 (23–30 Jul)

- Does not adopt the methodology
- Requests MEP to revise its recommendation and consider:
 - i. benefits and drawbacks of non-permanence provisions;
 - ii. rationale for 4.5% penetration rate as eligibility threshold;
 - iii. Appropriateness of benchmark approach in baseline standard.

MEP 016 (7–11 Sep)

- Recommends [“Energy efficiency measures in household cooking”](#) and [“Cooking energy transitions”](#) methodologies with limited amendments
- Publishes 40-page [information note](#) to justify its recommendation

SBM 023 (5–9 Oct)

- Will approve or reject the two clean cooking methodologies
- Can amend or withdraw MEP mandates
- Can request amendments to standards and tools
